GREENFIELD STATION GREENFIELD, MA

Stull and Lee teamed with an engineering prime for the design of two intercity rail platforms and canopies for MassDot / MBTA as part of a Federal Rail Administration High Speed Rail and Intercity Passenger Rail Grant program, dubbed the "Knowledge Corridor".

The new platform at Greenfield is sited adjacent to the new John Oliver Transportation Center; whose the contemporary language it emulates in both form and materials. The fully accessible high level platform includes new canopies and windscreens, and in the future will be connected to the center by a covered pedestrian walkway.
